Vehicle Count Time Series

Sampling 5 Hz overlay, interpolated display, loops 20-24 s

t(s)	Z-N cars	Z-E cars	Z-W cars	Z-S cars	region
0.0	9	11	7	8	35
4.0	9	11	7	8	35
8.0	8	12	7	7	34
12.0	9	11	6	8	34
16.0	9	11	7	8	35
20.0	9	10	7	8	34
24.0	9	11	7	8	35

Median regional parked cars: 34
Through-traffic excluded (tracks with speed > 4 m/s): 3 vehicles, not in occupancy.

Notes
Counts are stable. That stability is the point: a one-off delivery van does not create a 22pt occupancy miss. The kerbside stock is consistently below what a 95% occupied 142-unit block should show at 0.7-0.9 cars per occupied unit.
